

CERTIFICATE OF ATTENDANCE

I hereby confirm that Dr. Viacheslav Danilov from Pompeu Fabra University (Barcelona, Spain) has participated in a staff mobility program at Sapienza University of Rome (Rome, Italy) within the framework of the Erasmus+ programme for teaching and training from May 11 to May 15, 2026.

During this period, he took part in the following activities:

- Technical meetings and research discussions with the host academic and ALCOR Lab researchers on computer vision, pattern recognition, machine learning, and multimodal AI applied to perceptual inference and sensor data analysis.
- Delivery of a seminar entitled "**Illuminating the black box: Non-invasive intracranial pressure estimation via near-infrared photonics and deep learning**" (<https://www.diag.uniroma1.it/node/30655>), presenting work on non-invasive intracranial pressure monitoring using near-infrared photonics, signal decomposition, and deep learning, developed within the SafeICP project (<https://safe-icp.vercel.app>).
- Knowledge-exchange sessions on shared methodological ground between ALCOR Lab's work in computer vision and multimodal AI and the BCN MedTech team's research in biomedical signal processing and machine learning, with applications in non-invasive clinical monitoring and predictive modelling for healthcare.
- Working sessions to define joint research directions, co-authored publications, and potential European research initiatives between Pompeu Fabra University and Sapienza University of Rome.

Prof. Irene Amerini

Department of Computer, Control and
Management Engineering
Sapienza University of Rome
