

Machine Learning Certification

VIACHESLAV DANILOV

is hereby awarded this certificate of the achievement for the successful completion of the Google Machine Learning Crash Course.

ISSUE DATE
02 August 2018

Course report

ML Concepts:

1. Introduction to ML
2. Framing
3. Descending into ML
4. Reducing Loss
5. First steps with TensorFlow
6. Generalization

7. Training and Test Sets
8. Validation
9. Representation
10. Feature Crosses
11. Regularization: Simplicity
12. Logistic Regression

13. Classification
14. Regularization: Sparsity
15. Introduction to Neural Nets
16. Training Neural Nets
17. Multi-Class Neural Nets
18. Embeddings

ML Engineering:

1. Production ML Systems
2. Static vs. Dynamic Training
3. Static vs. Dynamic Inference
4. Data Dependencies

ML Real World Examples:

1. Cancer Prediction
2. 18th Century Literature
3. Real-World Guidelines

ML Practicum:

1. Convolutional Neural Networks
2. Preventing Overfitting
3. Leveraging Pretrained Models
